

Jourden Motter, B.S., COTA is our Certified Occupational Therapy Assistant. She is responsible for providing direct treatment intervention for your child. She works in collaboration with the Play2Grow Pediatric Therapy's team to provide families with interventions that are personal, innovative, and well-informed. She brings creativity and your child's individual interests into her interventions to create a meaningful and secure environment that gives him/her the courage to explore and succeed. She is excited to work with you and your family to ensure the best possible outcomes for your child.

Jourden found her passion for pediatric occupational therapy after completing her Level II Fieldwork as an OTA student with Play2Grow Pediatric Therapy. During her fieldwork experience, Jourden found special interest in using sensory integration as an intervention to support children in their overall growth and development to help build skills to enhance participation in all of life's activities. Jourden has a unique experience of having grown up in a home that facilitated childhood learning and development as a family owned local daycare.

Jourden received her Bachelor of Science degree in Kinesiology (2017) from California State University Sacramento and her Associate of Applied Science degree (2020) in Occupational Therapy Assistant from St. Catherine's University. She has earned her certification from the National Board of Certification in Occupational Therapy (NBCOT) and is currently licensed with the California Board of Occupational Therapy (CBOT).
